

## GraviGate® Safety Closure Systems

Introducing the GraviGate® safety gates to help guard against falls at ladder way, stairway and floor openings.

Made from Strong Reinforced Fiberglass, Gravi-Gates® are rugged, corrosion resistant and maintenance free.

Space Age Bearing Material allows Gravi-T® Hinges to swing silently to their closed position without using springs or messy lubricants.

Strong Stainless Steel hinge construction permits use in outdoor and corrosive environments.

Gravi-T® Hinges are electrically and thermally insulated to help guard against electric shock.

GraviGates® are long lasting, require zero maintenance, and are easy to install.

### Features

- › Meets OSHA Standard 1910.23a
- › Greaseless and self-lubricating
- › Safety Yellow in color
- › Corrosion resistant construction
- › Stainless steel hinges
- › Right and left swing
- › Springless return design
- › Standard & custom sizes available

### Applications

- › Ladder way guards
- › Floor Opening Protection
- › Mezzanine Walkways
- › Roof Ladder Guards
- › Tower Walkways and Ladders
- › Gantry Entrances and Exits
- › Livestock Gateways
- › One Way Personell Guard
- › Dangerous Equipment Guards
- › Large Equipment Ladder Guards

### Standard Sizes

Gate Size (in)	Right Hand Swing Part No.	Left Hand Swing Part No.	Weight (lbs)
16 x 16	CR-002620-000	CR-006000-000	11.7
18 x 18	CR-002630-000	CR-006010-000	12.2
21 x 21	CR-002640-000	CR-006020-000	12.8
24 x 24	CR-002000-000	CR-006030-000	13.3
27 x 27	CR-002650-000	CR-006040-000	13.9
30 x 30	CR-002660-000	CR-006050-000	14.5
33 x 33	CR-002670-000	CR-006060-000	15.0
36 x 36	CR-002680-000	CR-006070-000	15.6

- › To Determine Gate Size Subtract 2" from Opening Width.
- › All Gates are Available in Left Hand and Right Hand Swing Configurations.
- › Custom Sizes can be designed to fit your specifications
- › Optional All Stainless Steel Construction
- › Angle Bar and Round Bar Adapters
